Let’s say you are a commercial business with presence throughout the US and your company uses the following support areas:

1. Telecommunications
2. Data communications or information technology areas
3. Physical infrastructure or plan facilities
4. Transportation services
5. Accounting
6. Payroll
7. Customer service
8. Purchasing

Conduct a Business Impact Assessment of your business based on the above support areas. A Business Impact Assessment includes three parts: Criticality Prioritization, Maximum Tolerable Downtime estimation and Resource requirements identification.
